

## 350psi Gate Valve in High Demand

Since its introduction last year, interest in Mueller's industry-leading 350psi resilient wedge gate valve has boomed. Municipalities and engineers have upgraded their specifications to require this higher-performing, AIS-compliant gate valve and contractor feedback on the lighter weight, all-ductile iron construction has been very favorable. The dual purpose lifting lugs and user-friendly T-head bolt retention features provide for easier installation. In addition, the valve is triple listed; it meets American Water Works Association's C515 standards, is UL listed and FM approved. For more information, please visit [www.muellercompany.com](http://www.muellercompany.com).

## Mueller App Now Available

On February 18, Mueller Co. released an app that features competitive cross reference for service brass, project-specific certification requests, and resource links. The app – available from the Apple App and Google Play stores – is designed for distributors but engineers and water utilities will find it handy as well. To add to your smart phone, simply scan these QR codes or search for “Mueller Co” in the app store and download for free.

## Over 300 BIM Models Available Online

Over the past year, Mueller Co. has created Building Information Model (BIM) files for our fire hydrants and gate valves. These 3D drawing files – available in either .igs or .x\_t format – can be downloaded by engineers, contractors, and others involved with project design from our website here. Once downloaded, our products are then added to the project's BIM design. If you are having trouble viewing these our BIM files or do not have access to BIM software, we recommend uploading the .x\_t file format to: <https://360.autodesk.com/viewer>. We have found this website functions best in Google Chrome.

## EchoShore-TX Permanent Pipe Monitoring

For the most critical water transmission mains, a greater frequency of information on leak status is often preferable to periodic “snapshot-in-time” methods — especially since leaks can occur anytime between inspections. In contrast with a periodic leak survey approach, permanent monitoring offers the unique advantage of being able to detect a leak early, and steadily monitor its progression to determine the urgency of repair. Immediate leak status information can help municipalities prevent catastrophic failures, and the capability to repeatedly identify and track the leak progression reduces “false-positive” leak signals that can occur during spot inspections. To see a demo video of our EchoShore-TX Permanent Pipe Monitoring System, go to [www.echologics.com](http://www.echologics.com).

## Hydro-Guard® Improves Water Quality and Saves Man-Hours for Central Texas Vacation Community

In this latest case study from Mueller Co., the City of Horseshoe Bay, Texas reports labor cost savings after installing 10 Hydro-Guard® HG-1 Signature automatic flushing units and 7 Safety-Guard® sampling stations. According to Steve Hawley, Plant Operations Supervisor, “We’ve freed up man-hours and seen improvement in trouble areas. In some areas, a single HG-1 is saving us four to five hours of labor every week.” To review the entire case study, please visit [www.muellercompany.com](http://www.muellercompany.com). To learn about the many benefits of automated flushing systems, please visit [www.hydro-guard.com](http://www.hydro-guard.com).

## Mueller® Innovations Featured in The Municipal Magazine’s April Issue

The April 2015 issue of The Municipal magazine includes a 2-page story about Mueller’s history of innovation in the water distribution market. According to the article, “Many innovative products developed by Mueller Co., such as the water main tapping machine and copper flare connections, have become industry standards. As the needs of today’s water utilities evolve, Mueller Co.’s range of products and services continues to expand to help ensure that customers continue to have access to the safe, clean drinking water on which they depend.” To read the article in its entirety, go to [www.themunicipal.com/view-newest-edition/](http://www.themunicipal.com/view-newest-edition/).

## Water Distribution Products Training School

Over the past several months, Mueller has conducted 8 sessions of our annual Water Distribution Products Training School at the Mueller Technology Center in Chattanooga, TN. Designed specifically for Mueller® authorized distributor personnel, the school includes classroom instruction, plant tours and hands-on product experience. This year’s attendees have come from more than 25 states, 4 provinces and 13 countries. To see what recent attendees have shared or the 2015 mobile training schedule, please visit: [www.muellercompany.com/resources/training/](http://www.muellercompany.com/resources/training/).

## Integral Handle Option for Meter & Service Valves

In addition to providing handles that can be added after installation, Mueller now offers an integral handle option for ¾-inch and 1-inch meter and service valves. This new integral handle is our most robust and durable permanent valve control solution. For more information, please contact your Mueller sales representative.

## See You in Anaheim!

Mueller is busy preparing for the annual AWWA ACE conference and exposition to be held June 8-10, 2015 at the Anaheim Convention Center in Anaheim, California. Stop by booth #1600 to see our newest product innovations and make plans to attend “Mueller Night”, our invite-only hospitality event. This year, it will be held on Monday, June 8 from 6-9pm at Tortilla Jo’s in Downtown Disney. For more information about the conference, please visit: [www.awwa.org](http://www.awwa.org).

## Order Your Updated Jones® Catalog Today

In February, Mueller released an updated Jones Water Distribution Products catalog. The catalog can be ordered or downloaded from the Jones website at <http://joneswaterproducts.com/ProductCatalog.asp>. Please indicate if you need the contents only or the contents plus the binder. Allow 2-4 weeks for delivery.

## Website FAQs Make Obtaining Answers Faster

To find answers to questions easier, we have improved the frequently asked question (FAQ) area of our website. These improvements include the addition of more than 100 FAQs, a shortcut on the main menu, and information fully categorized and searchable. Check out today by visiting [www.muellercompany.com/faq/](http://www.muellercompany.com/faq/).

## Mueller’s Core Values: Deliver Exceptional Results

We expect the best of each other – and ourselves. We are accountable for accomplishing aggressive goals and objectives. We believe “good enough” isn’t. We know our customers, investors and employees have a choice of where to do business, invest their money and work. Our actions demonstrate why that choice is Mueller Water Products.

Delivering Exceptional Results means we will:

- Set aggressive goals that encourage us to stretch our capabilities.
- Reward our stockholders by maximizing long-term value.
- Take thoughtful, proactive action in situations that may not be specified in any procedural manual.
- Consistently think about the impact of actions on the bottom line.

## Trouble Logging Into Our Website?

U.S. distributors can access a special section of our website by going to [www.muellercompany.com/Login.aspx](http://www.muellercompany.com/Login.aspx), entering their Mueller account number less the last two zeros as the User Name and their zip code as the Password. If you would like access or have questions, please contact Customer Service at 800-423-1323.

## Have a Product Development Idea?

Have an idea for a new product or service? See a gap in our offering? Submit your idea today! Simply visit our website, complete the form and we will be in touch.
