

Remote Pressure Monitoring System

“The Mueller Pressure Sensor was installed several months ago for Cleveland Utilities at a site where Distribution wanted to know current and ongoing conditions in our water system. The user friendly interface allows anyone to readily find and analyze system pressures...When pressures reach critical numbers (>40 psi over normal), I can receive immediate information for a more detailed analysis. Fire Hydrant tampering and unauthorized closing of valves are only examples of what can be determined by this breakdown. I firmly believe that when it comes to pressure monitoring in our Distribution system, I can never have too much information.” *Jay Mullin, Cleveland (TN) Utilities, Water Division. Mueller Water Products Recognized for Best Smart Water Solution

Mueller Water Products recently received the 2014 Best Smart Water Product or Solution award at the inaugural Smart Water Summit in Palm Beach Gardens, Florida. Sponsored by Smart Grid Summits, the Smart Water Summit is an invitation-only boardroom event that offers participating providers of smart water solutions access to the executive leadership of North America's public, rural and municipal water utilities. Thirty-three participating smart water technology providers competed for the award, which was voted on by 100 utility executives representing some of the most progressive water utilities in North America. Mueller Water Products received the award for its suite of Intelligent Water Technology™ solutions. This offering of data-driven solutions for some of the most pressing needs of today's water utilities includes:

- The EchoShore™ system from Echologics, which provides continuous fixed transmission main leak monitoring;
- The Mi.Echo™ system - from Mueller Systems, which provides continuous distribution main leak monitoring;
- Mi.Net® - Mueller Infrastructure Network for Utilities, an advanced metering infrastructure system, which features a remote disconnect service; and
- Remote Pressure Monitoring from Mueller Co., which provides continuous monitoring of pressure in potable water distribution systems.

New Sales Locator and FAQs on Muellercompany.com

Improvements continue on our primary website to make obtaining service and locating information faster and easier for our customers. Rather than search by state, zip or country using drop-down menus, locating the closest authorized Mueller distributor is now easier than ever using interactive maps. Simply click on your world region, country, and/or state, and all sales representatives and distributors are displayed. Having trouble finding answers to your questions? Improvements have been made in our Frequently Asked Questions (FAQs) area as well. In addition to dozens of FAQs and a shortcut added to the main menu, information is now categorized and searchable. Look for additional visual enhancements coming later in 2015.

New 350psi Gate Valves Installed on Restore Biloxi Infrastructure Repair Program

In the fall of 2014, Consolidated Pipe & Supply provided Oscar Renda Contracting with over 1,300 of Mueller's new 350psi resilient wedge gate valves. In addition, over 400 Super Centurion® 250 fire hydrants and 2,500 pieces of service brass were shipped to the project. The \$116 million "North Contract" is Biloxi's largest municipal public works project ever and represents the bulk of the city's recovery projects from Hurricane Katrina. Oscar Renda Contracting is replacing water mains, sanitary sewer lines, storm drains, and pump stations. Supplied in sizes ranging from 6 to 16 inches, the Mueller A-2361 resilient wedge gate valve features dual purpose lifting lugs, a user friendly T-head bolt retention design and a unique 'pressure assist' wedge geometry. The valve is also triple listed; it meets American Water Works Association's C515 standards, is UL listed and FM approved.

54-inch RWGV on Peninsula Seismic Upgrade Project

The Chattanooga Plant recently coordinated the production of and shipped two (2) 54-inch gate valves to the \$22.5 million Peninsula Seismic Upgrade project in San Mateo, California. The objective of the project is to seismically upgrade San Andreas Pipeline 2, San Andreas Pipeline 3 and Sunset Supply Branch Pipeline at five sites to address fault crossing, ground shaking and liquefaction-related seismic conditions.

Improved Stainless Steel Saddle Strap Design

Mueller is pleased to announce an improvement to the stainless steel saddle strap design for both the BR and DR product lines. The design increases the strength of the strap. Currently, all orders for 6- and 8-inch single and double strap bronze and ductile saddles are being shipped with the improved strap. Orders for all remaining size configurations will be filled with the new improved strap design over the first part of the year. Ask your Mueller sales representative for more details.

Shallow Bury Post Indicator

Mueller has extended the A20806/A20807 series to include a Shallow Bury Post Indicator. In warm climates with little or no frost line, valves are not buried very deeply. When valves – especially larger one – are installed vertically, a standard post indicator is often too tall. This new post indicator is designed for valves from 4” to 24” and features a shorter upper barrel. A small white sticker is placed on the head to identify it as “shallow bury”.

Non-Adjustable Post Indicators and Post Indicator Extensions

Expanding on Mueller’s successful adjustable post design, non-adjustable post indicators (PI’s) and vertical extensions are now much stronger and more reliable as a result of our new bolted design. In addition to our standard length PI’s and extension kits (same as the previous welded design), the length of our improved kits and vertical indicator posts can be changed in the field using ductile iron pipe cut to the desired length.

Registration Open for Water Distribution Products Training School

Register for our annual Water Distribution Products Training School to be held January through March 2015 at the Mueller Technology Center in Chattanooga, TN. Designed specifically for Mueller® authorized distributor personnel, training includes hands-on product experience. Regular

classes will be held January 27-29, February 10-12, February 17-19, and March 3-5. One advance class is scheduled for March 10-12. Class sizes are limited to 20 students so make your reservations as soon as possible by sending your request to Barbara Dorothy at bdorothy@muellercompany.com.

In addition, our Mobile Training Van travels throughout the country to train end users, contractors, and engineers in warmer months of the year.

Mueller’s Core Values: Act with Integrity – Do the Right Thing

We are honest, ethical and act with integrity with each other, our customers, stockholders and other business partners. We do what is right, not what is easy. We value, protect and enhance the reputation of our brands. Acting with Integrity means we:

- Tell the truth
- Obey the law
- Foster actions in line with our values
- Conduct ourselves with the highest standards of behavior and fairness
- Reward the right values and disapprove of others

Mueller App Due Out in February

Mueller has developed a smart phone app that saves customers time and hassle. It features a handy cross-reference tool for service brass products, allows the user to request product certifications for specific project submittals, and includes resource links that make finding the 1,500+ downloads on muellercompany.com even faster. To install, visit the Apple App Store or the Google Play and search for “Mueller Co.”

Have a Product Development Idea?

Have an idea for a new product or service? See a gap in our offering? Submit your idea today! Simply visit our website, complete the form and we will be in touch.

Interested in Joining the Mueller Team?

Mueller Co. has launched a new careers portal that provides individuals with an easy way to explore job openings and understand the many benefits of joining North America’s largest and only full-line supplier of potable water distribution products. The new job board, accessed through www.muellercompany.com/careers, enables individuals to view open positions within Mueller Co. and across the entire Mueller Water Products organization. Prospective employees can view current job openings by location, profession, or business unit. Visitors can also create a job agent to search postings to identify matches based upon specific skill sets. Once a match is found, applying for the job opening is just a couple clicks away.
