

Mueller Co. Receives Numerous Patents This Year

Continuing its rich heritage of product innovation, Mueller Co. has been issued several patents so

far this year. Some of these include an improved adjustable meter pit developed by the Cleveland engineering team and integrated leak detection for fire hydrants, which combines technology from Echologics and Mueller's most iconic product. These inventions add to our portfolio and set the company apart from our competitors as both an innovator and solution provider.

Title	Patent #
Relay Modules for Communication within a Mesh Network	9287963
Fire Hydrant Leak Detector	9291520
Adjustable Underground Meter Installation	9243944

First Responders Learn How Mueller® Fire Hydrants Are Made

Fire Rescue TV produced a video for Mueller Co. that provides a rare look inside the company's fire hydrant plant in Albertville, AL. This informative video takes viewers on a tour of the plant, outlining the new, semi-automated fire hydrant production process from start to finish. Check out this new video on our YouTube channel: www.youtube.com/user/MuellerCo500.

Download New Smart Water Handbook

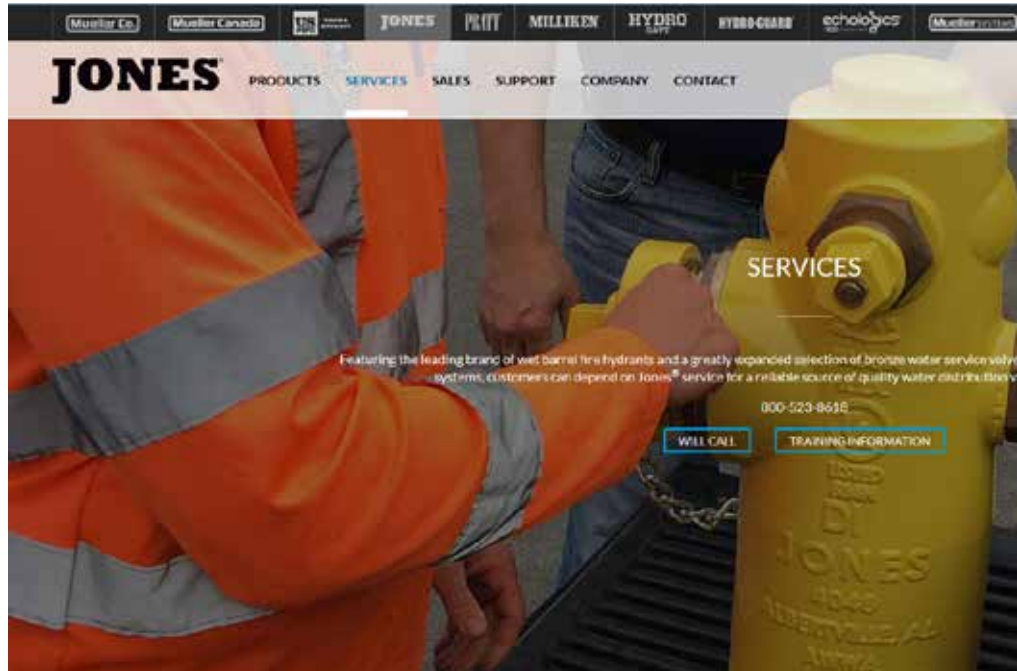

Water & Wastes Digest magazine has released a new publication highlighting technologies available for water utilities looking to develop a smart cities infrastructure. The Smart Water Handbook highlights the benefits of Mueller Water Products' smart water solutions, including how they provide utilities with valuable, actionable data. It defines what a smart water utility is and how smart technologies solve common challenges, as well as how utilities of any size can implement IoT technologies. For more information, visit www.smartwaterbook.com.

Mueller's Core Values

Mueller Water Products has a set of Core Values to help us think, act and work together to benefit all of our stakeholders – from our employees who are our most valued assets, to our customers who expect quality products and service, and to our investors who entrust their capital to us. These Core Values are not an end in themselves. Rather, they form the foundation of our culture, define behaviors required of us all and guide our decision making.

New Jones® Water Distribution Products Website Live

Mueller Co. has launched a new website for its Jones line of wet barrel fire hydrants and water distribution products. Featuring dynamic display, impactful visuals, and improved navigation, the new website organizes product details by part number which makes it much easier for visitors to gather information needed for submitting or operating Jones water distribution products. Visit www.joneswaterproducts.com today!

Hydro-Guard® Technology Featured In April Issue of ES&E Magazine

Jason Barlow, Chief Operator of Water Systems for the City of Brockville, Ontario outlined the benefits and cost savings associated with the City's installation of a Hydro-Guard automated flushing system in the April issue of ES&E Magazine. The article details the history of the City's water main flushing program, and the benefits and return on investment achieved by installing Hydro-Guard technology. To read the entire article, go to https://issuu.com/esemag/docs/ese_april_2016_digital_ed/36?e=14275946/34765807.

PRODUCT ENHANCEMENTS

Continued Expansion of Service Connections

Available service connections now include the 3/4" and 1" IPS Mueller® Grip Connections. This compression connection works with IPS polyethylene (PE) per ASTM D2239 (SIDR-7) using the IPS PJ stainless steel liner. Adding this connection has increased our offering to 21 different types of service connections. For more information, contact your Mueller Co. sales representative.

20" x 11 1/2" Double Meter Box Lid Now Available

Mueller Co. recently announced the addition of two new sizes of double meter box lids: (1) 18" x 11 1/2" H-10812; and (2) the very popular 20" x 11 1/2" H-10814. Both come standard with pentagon nuts and a plastic inner lid and are available with single or double surface-mounted, touch / radio read hole(s) and a composite lid with touch / radio read brackets.

Flexible Disc Check Valve Options

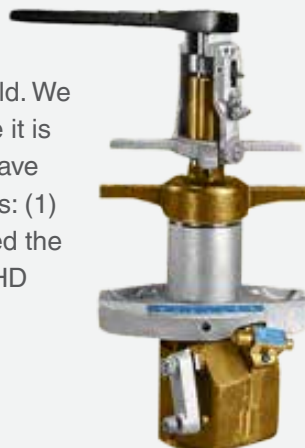

The Mueller® ductile iron flexible disc check valve (Model #851A) now includes options such as: disc position indicator, external backflow device, proximity limit switch, and stainless steel cover bolts. These options complement a list of features that include 250psig maximum working pressure, ANSI/NSF 61 certification, and epoxy-coated interior

and exterior. Model #851A is available in sizes from 2 to 24 inches. For more information, contact your Mueller Co. sales representative.

Updated B-101 Drilling & Tapping Machine Videos Released

The company has begun the process of updating our product training videos, many of which are 20+ years old. We started with the B-101 drilling & tapping machine, since it is the most watched video on our YouTube channel. We have re-created the 19-minute instructional video in two parts: (1) manual operation; and (2) power operation, and reduced the duration to approximately 7 minutes each. These new HD videos are available on our YouTube channel at: www.youtube.com/user/MuellerCo500.

New D-5 Drilling Machine Training Video Now Available

Mueller Co. continues updating our popular product training videos and have just released a new instructional video for the D-5 Drilling Machine. The D-5 drills 5/8" to 2" holes in pressurized water mains through all types of pipe material. The four minute video guides the operator through the complete operation of this machine. It is available on our YouTube channel at www.youtube.com/user/MuellerCo500.

Have a Product Development Idea?
