

FIRE PROTECTION PRODUCTS

Cast Iron Cover has a lifting lug.

Cover Bolts and Nuts are electrogalvanized steel to resist corrosion.

Operating parts made of bronze and stainless steel to reduce corrosion.

All internal parts can be removed for inspection or repair without removing valve from line.

Accurately machined Bronze Seat Ring.

Disc available with either rubber cap or Bronze seat.

Cast Iron Body is accurately cast and machined to provide long and trouble free service.

Bronze mounted cast iron Clapper Arm provides long and trouble free services.

MUELLER CO. also offers a full line of AWWA Type Check Valves. See MUELLER Water Works Catalog for further information.

The MUELLER® UL listed and F/M approved Check Valves are of the gravity operated, swing check design. These Check Valves are rugged in construction and simple in design.

MUELLER Check Valves are bossed on both sides of the body for connecting by-passes and have a drain plug at the bottom under the inlet end for attaching a drain valve.

The MUELLER Check Valves are designed to permit the removal of all parts through the top of the valve for inspection or replacement without removing the valve from the line.

These Check Valves are available with either rubber or bronze disc facings.
