

# MUELLER® O.E.M. FIRE HYDRANT REPAIR PARTS AND REPAIR KITS

MUELLER CO. considers a fire hydrant to be a critical piece of emergency equipment used to preserve lives and property. For this reason all Mueller Fire Hydrants are designed, built and tested to assure high performance and dependability.

Each component part of a MUELLER Fire Hydrant is specially designed to assure proper and reliable operation. Attention to detail doesn't stop once the part is designed. Quality control tests are made on all component parts to assure dimensional and material integrity are maintained. Every MUELLER Fire Hydrant is pressure tested and operated before it leaves our plant to assure it meets our high quality standards.

MUELLER CO. is confident it produces one of the most reliable fire hydrants available and backs this claim with a **10 YEAR LIMITED WARRANTY ON PARTS AND WORKMANSHIP** for the MUELLER Super CENTURION® Fire Hydrant. The claim of outstanding performance and reliability is proven by the fact that almost half of all the fire hydrants sold in the United States today are manufactured by MUELLER CO.

A fire hydrant is exposed to the elements on a daily basis and over a period of time repairs may eventually become necessary. MUELLER CO. offers repair kits that have the same parts as are used in our regular production hydrants. When you use genuine MUELLER replacement parts you are assured the part matches the manufacturer's original equipment specifications with regard to dimensions, materials and performance. Only genuine MUELLER parts are marked with the MUELLER name.
