

MUELLER TAMPER-PROOF OPERATING NUT

This simple, yet effective option fights three challenges to the fire hydrants in your system:

- Unauthorized operation
- Theft of parts
- Vandal inflicted damage to the operating and hold-down nuts

A cast iron cap that spins freely on top of the hydrant bonnet shields the operating mechanism and protects it from would-be vandals. Common tools cannot grip the

cap, the operating nut or the specially shaped hold-down nut. Only authorized utility and fire personnel will have the tools needed to operate the hydrant or to remove the cap and hold-down nut if the hydrant ever needs repair.

The Tamper-Proof feature can be ordered factory-installed on new Centurion hydrants, or as a kit to retrofit Centurion and Mueller Improved hydrants in the field.

Factory Installed Fire Hydrants with Tamper-Proof Feature

For 4-1/2" and 5-1/4" Mueller® Centurion® Hydrants

Option 114 - Centurion Fire Hydrant with installed Tamper-Proof feature for open left or open right. Specify "Option 114" on order.

Option 110 - Centurion Fire Hydrant with installed Tamper-Proof cast iron hold-down nut only, for open left or open right. Specify "Option 110" on order.

Tamper-Proof Retrofit Kit

For 4-1/2" or 5-1/4" Centurion and Mueller Improved fire hydrants currently in use.
