

MUELLER® TAMPER-RESISTANT HYDRANT HOLD-DOWN NUT

Rev. 9-09

The Mueller Tamper-Resistant Hydrant Hold-Down Nut is specially designed to make Mueller Centurion® and Improved Fire Hydrants more resistant to tampering. It replaces the existing hold-down nut (and weather cap on hydrants dated 1987 and earlier) and surrounds the operating nut, helping prevent unau-

thorized operation of the hydrant. The special operating wrench for use with this option may also be used with other hydrants.

The O-ring sealed hold-down nut may be ordered "open left" or "open right" as either original equipment or as a retrofit.

Retrofit parts and wrench

Part Numbers	Centurion Hydrant	Improved Hydrant
Open right	142978	175347
Open left	143112	142037
Operating wrench	A-310	A-310

Preinstalled

When ordered as original equipment, option #004 must be specified.
