New products and developments from the Leading Supplier of Water Distribution Products

## Now Available: AquaGrip™ In Iron Pipe Sizes (IPS)

The AquaGrip product line has been expanded to include 4" and 6" IPS sizes on the Mueller® 2361 resilient wedge gate valve and Super Centurion® 250 fire hydrant with 6" shoe inlet. The IPS AquaGrip connection is ready to use on IPS PVC up to DR21, and on polyethylene to DR17 without the need for a liner or insert. Valve configurations available are AquaGrip x AquaGrip, AquaGrip x Mechanical Joint and AquaGrip x Flange.

The IPS AquaGrip version can be readily identified by the color of the intermediate ring

and gripper band. Epoxy coated in Sienna Red (just like our gate valve), the IPS intermediate ring and gripper band are visually distinguishable from the black Rilsan coated DIPS versions. All other components are identical to the DIPS AquaGrip connection (end ring, gasket, hydrant shoe or valve body).

Tapping adapters for the Mueller CL-12 and C1-36 machines are available to make pressurized taps using the IPS AquaGrip x flange valves. These are the same adapters used for the DIPS sizes.

## Also Available: Corrosion Resistant Bolts and Break-Nuts For AquaGrip™

A new option is available for all AquaGrip valves and hydrants. The AquaGrip bolts and break-off nuts can now be provided with the corrosion protection of Tripac 2000 Blue Coating System, for a minimal price adder. The Tripac system is a two-step coating process. First, the bolts and nuts undergo surface preparation, including abrasive blasting. Then they are treated with

a baked aerocote nickel primer. Next, several coats of Tripac 2000 Blue (a fluoropolymer coating) are sprayed on electrostatically. Finally, the coated product is heated to 425° F to ensure a permanent bond.

Extensive salt spray testing and field experience confirm superior corrosion resistance, compared to zinc plated or hot dip galvanized bolts and nuts.

## Updated Super Centurion® 250 Product and Training Videos

The Super Centurion 250 product video has been updated. Our state of the art and environmentally friendly lost foam casting process is highlighted, as well as all the features that make the Super Centurion 250 fire hydrant the market leader. Also, we've

produced a brand new video showing how to perform important maintenance procedures on Centurion hydrants. Both videos are available through your Mueller Sales Representative or through our Literature Department.

## Updated Mueller Water Catalog on CD ROM

The latest revision of the Mueller Water catalog is now available on CD ROM. In addition to all the same information provided in our print catalog, the CD version includes many extras. Several powerful calculators make it easy to figure flows and pressure loss, as well as

make conversions. Downloadable manuals and sample specifications are also included to help simplify your work. We think you'll find the CD-ROM version of our catalog is the superior method for accessing our entire product line.

## New: 18" – 24" Tapping Valves

The Mueller 18" – 24" T2361 resilient wedge valves are now available for sale. With an oversized waterway to allow use of a full size shell cutter and raised alignment lip per MSS SP60, the Mueller large diameter tapping valves are the obvious choice for your tapping needs.

All of the Mueller Marketing News letters published to date are on our website in PDF format. Just go to [www.muellercompany.com](http://www.muellercompany.com) and click on Downloadable Files. Then click on Potable Water Distribution Products and finally on "Bulletins". You can quickly get updated on the newest products from the leading supplier of water distribution products in the industry.

# News about Mueller Brass Products:

The following service line valves and fittings are now available:

Size	P/N	Description
1"	B25168	1" flare x 1" FIP service valve with 5.25" lay length (for retro fit applications)
3/4" – 2"	B25132	Copper flare x 110® CTS compression connection curb valve
3/4" – 1"	B25152	110 CTS compression connection x 110 IPS compression connection ball curb stop with Minneapolis Pattern
1"	H15464	IPS Insta- Tite® x IPS Insta- Tite 90 degree ell
3/4" x 3/4" x 1"	H15387	3/4" 110 CTS x 3/4" 110 CTS x 1" MIP Tee
3/4" x 3/4" x 1"	H15391	3/4" 110 CTS x 3/4" 110 CTS x 1" FIP Tee
1" x 1" x 3/4"	H15385	1" MIP x 1" MIP x 3/4" 110 CTS Tee
1-1/2" x 1" x 7-1/2"	H15363	1-1/2" 110 CTS x (2) 1" MIP U-branch with 7-1/2" width
1" x 3/4" x 6-1/2"	H15363	1" 110 CTS x (2) 3/4" MIP U-branch with 6-1/2" width
3/4" x 1"	H15127	110 CTS x FIP with Minneapolis Pattern
3/4" x 1"	H15182	110 CTS x FIP with Drain
5/8" x 3/4" x 3/4"	E14500	5/8" x 3/4" or 3/4" meter swivel nut x 3/4" PEP/PVC PJ meter coupling
2" x 2" x 1"	790048	FIP x FIP x FIP Tee
3/4" x 1-1/2"	700065	3/4" FIP x 1-1/2" PVC plastic Pipe Slip Coupling
3/4" x 1"	H18030	Coupling for replacing iron pipe with copper service pipe

These new items will be added to our catalog in the next update. Contact your local Mueller Distributor today for all your service brass needs.
