

MUELLER

COMPOSITE ADJUSTABLE VALVE BOX

INSTALLS WITHOUT LIFTING EQUIPMENT AND PROTECTS THE VALVE FROM TRAFFIC LOADS

Made of rugged yet light weight composite polymer material with a floating, self-leveling top, the Mueller MVB Valve Box helps reduce installation and maintenance costs. On site, the box length can be easily adjusted to match the valve to grade dimension using ordinary hand tools. It's one piece with no joints, so misalignment is a thing of the past. Because it's lightweight, installation is easy and quick, and the box is much safer to handle.

The ductile iron top is designed to float above the box, isolating the box and valve from traffic loading. Its large diameter with beveled edges resist damage from road maintenance equipment, and when the road is resurfaced, the top is reusable and easily adjusted to the new grade.

Available in standard lengths from 5' to 13' with a choice of Ductile Iron Tops providing adjustments to these heights from 6" to 1' - 6" additional.

Lower installation and maintenance costs, less inventory to stock and overall ease of use, make purchasing the Mueller MVB Composite Valve Box the logical choice.
