

BRONZE SERVICE SADDLES

Installation Instructions for J975, J979, J965 and J969

IMPORTANT: Always follow pipe manufacturers' recommendations for style of saddle suitable for use on size and type of pipe involved.

1. Inspect pipe surface in area saddle is to be located, avoiding areas of deep pitting or other significant surface defects which could prevent saddle from sealing properly on pipe.
2. Clean pipe surface thoroughly (particularly in area where saddle seal will seat) and check saddle O-ring seal for damage. In addition, care should be taken to assure the pipe surface under the strap is free from debris which could keep the strap from fitting uniformly around the pipe.
3. Tighten nuts evenly.
